

FRONTIERS OF MICROBIOLOGY

Symposium & Faculty Recruitment

February 10, 2022, 10:00am – 5:30pm

EPNEC Auditorium

Webinar code: 0210

SPEAKERS:

10:00 a.m.

Michele LeRoux, PhD

Postdoctoral Fellow, Massachusetts Institute of Technology

A role for toxin-antitoxin systems in bacterial immunity to phage

11:00 a.m.

Satoshi Kimura, PhD

Associate Scientist, Harvard University

New perspectives on translation control by RNA modification in pathogens

1:00 p.m.

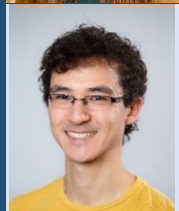

Kyla Ost, PhD

Postdoctoral Fellow, University of Utah

Adaptive immunity shapes friendlier fungi in the gut

2:00 p.m.

Apollo Stacy, PhD

Postdoctoral Fellow, National Institute of Allergy & Infectious Diseases

Role of poly-microbial interactions in health and disease

3:30 p.m.

Chang Liu, PhD

Postdoctoral Associate, Yale University

Structural Insights into Nucleases in Proofreading Coronavirus Replication and Driving the Diversity of Host Adaptive Immunity

4:30 p.m.

Jian Xie, PhD

Associate Research Scientist, Yale University

Membrane-Associated Virus-Host Interactions in Infection and Innate Immunity

Jointly sponsored by:

**Department of Molecular Microbiology and
Center for Women's Infectious Disease Research**
